Section 03: Food safety and nutrition

## Pippins Preschool Policies: 03 Food safety and nutrition policy

Section 03 Food safety and nutrition

# 03 Food safety and nutrition policy

Alongside associated procedures in section 03 Food safety and nutrition, this policy was adopted by Pippins Preschool in September 2022.

### Aim

Our setting is a suitable, clean, and safe place for children to be cared for, where they can grow and learn. We meet all statutory requirements for food safety and fulfil the criteria for meeting the relevant Early Years Foundation Stage Safeguarding and Welfare requirements

# Objectives

- We recognise that we have a corporate responsibility and duty of care for those who work in and receive a service from our provision, but individual employees and service users also have responsibility for ensuring their own safety as well as that of others. Risk assessment is the key means through which this is achieved.
- Procedure 01.03 Kitchen is followed for general hygiene and safety in food preparation areas.
- We provide nutritionally sound snacks which promote health and reduce the risk of obesity and heart disease that may begin in childhood.
- Following dietary guidelines to promote health also means taking account of guidelines to reduce risk of disease caused by unhealthy eating.
- Parents share information about their children's particular dietary needs with staff when they enrol their children and on an on-going basis with their key person. This information is shared with all staff who are involved in the care of the child.
- Foods provided by the setting for children have any allergenic ingredients identified on the menus.
- Care is taken to ensure that children with food allergies do not have contact with food products that they are allergic to.
- We display posters showing clearly which children have which allergies or special diets.
- The risk assessment for allergy includes individual children who have a food allergy.

### Further guidance

Safer Food Better Business for Caterers (Food Standards Agency)

# 03.01 Food preparation, storage and purchase

#### General

- All staff have up to date certificated training on food safety.
- The setting manager is responsible for ensuring that the requirements in Safer Food Better Business are implemented.
- The setting manager is responsible for overseeing the work of the cook and all food handlers to ensure hygiene and allergy procedures are complied with.
- The setting manager has responsibility for conducting risk assessment based on the 'Hazard Analysis and Critical Control Point' method set out in Safer Food Better Business.
- The setting manager maintain a Food Allergy and Dietary Needs poster with:
  - a list of all children with known food allergies or dietary needs updated at least once a term (the personal/medical details about the allergy or dietary needs remain in the child's). The Risk Assessment for Allergies is clearly displayed and shared with all staff.
  - a copy of the Food Allergy Online Training CPD certificate for each member of staff that has undertaken the training
- The setting manager is responsible for informing trustees who then report to Ofsted any food poisoning affecting two or more children looked after on the premises. Notification must be made as soon as possible and within 14 days of the incident.

## Purchasing and storing food

- Food is purchased from reputable suppliers.
- Pre-packed food (any food or ingredient that is made by one business and sold by another such as a retailer or caterer) is checked for allergen ingredients and this information is communicated to parents alongside menu information. For example, a meat pie bought at a supermarket or a tin of baked beans or the ingredients for a recipe prepared on site.
- If food that is not pre-packed (described as 'loose food'), such as sandwiches bought from a bakery is served, then allergen information will have been provided by the retailer. This information must then be shared in the same way with parents.
- Parents are requested not to bring food that contains nuts. Staff check packets to make sure they do not contain nuts or nut products.
- Bulk buy is avoided where food may go out of date before use.
- Dried packaged food is not decanted from packaging into large bins or containers as this prevents monitoring of sell by/use by dates and allergen information.
- Food is regularly checked for sell by/use by dates and any expired items are discarded.
- Bottles and jars are cleaned before returning to the cupboards.
- Items are not stored on the floor; floors are kept clear so they can be easily swept.
- Perishable foods such as dairy produce, meat and fish are to be used the next/same day. Soft fruit and easily perishable vegetables are kept in the fridge at 1 to 5 Celsius.
- Packaged frozen food should be used by use by dates.
- Fridge thermometers should be in place. Recommended temperatures for fridge 37 degrees Fahrenheit (3 degrees Celsius), and freezers 0 degrees Fahrenheit (-18 degrees Celsius). Temperatures must be checked and recorded daily to ensure correct temperatures are being maintained.
- Freezers are defrosted every 3 months or according to the manufacturer's instructions.
- Fruit and vegetables stored in the fridge are washed thoroughly before refrigeration to reduce risk of pests and E.coli contamination.
- Staff's own food or drink should be kept in separate designated area of the fridge.
- Items in fridges must be regularly checked to ensure they are not past use by dates.

## Preparation of food

- Food handlers must check the content of food/packets to ensure they do not contain allergens.
- Food handlers wash hands and cover any cuts or abrasions before handling food.
- Separate boards and knives are used for chopping food, usually colour coded.
- Raw and cooked foods are prepared separately.
- All vegetables and fruit are washed before preparing.
- Children with a wheat or gluten allergy are not offered toasted gluten-free bread. Separate spread is used.
- Food prepared for children with dietary needs and preferences is clearly labelled and every effort is made to prevent cross-contamination.

## Serving Food

- Staff risk assess the likelihood of children with dietary restrictions accessing the food of other children and must take appropriate action to prevent this from happening, for example:
  - check the list of children's dietary requirements displayed in the food preparation area and the green room.
  - crockery with the child's name written on in permanent marker
- Children with allergies/food preferences are not made to feel 'singled out' by the methods used to manage their allergy/food preference.
- Food served to children with identified allergies is checked by the staff serving to ensure that the food does not contain any of the allergens for that child.
- Tables are cleaned before and after, with soapy water or a suitable non-bleach product or food-safe anti-bacterial spray.
- Members of staff serving food wash their hands and cover any cuts with a plaster and a glove.

#### Packed lunches

Where children have packed lunches staff promote healthy eating, ensuring that parents are given advice and information about what is appropriate content for a child's lunch box. Parents are also advised to take measures to ensure children's lunch box contents remain cool i.e. ice packs, as the setting do not have facilities for refrigerated storage of children's lunches.

[From EYA Policy 03.04 Menu planning and nutrition, which was otherwise not relevant and is not included in Pippins Preschool policies]

### E.coli prevention

Staff who are preparing and handling food, especially food that is not pre-prepared for consumption e.g. fruit and vegetables grown on the premises, must be aware of the potential spread of E.coli and must clean and store food in accordance with the E.coli 0157 guidance, available at:

www.food.gov.uk/business-industry/guidancenotes/hygguid/ecoliguide#.U7FCVGIOWdI

## Pippins Preschool Policies: 03.02 Food for play and cooking activities

Section 03 Food safety and nutrition

# 03.02 Food for play and cooking activities

Some parents and staff may have strong views about food being used for play. It is important to be sensitive to these issues. For example, children who are Muslim, Jewish, Rastafarian, or who are vegetarian, should not be given any food to play with that contains animal products (Gelatine). Parents' views should be sought on this. In some cases, it is not appropriate to use food for play at all, particularly in times of austerity.

- Food for play may include dough, corn flour, pasta, rice, food colourings or flavourings.
- Jelly (including jelly cubes) is not used for play.
- Children with allergies do not play with food which may trigger their allergies.
- Staff are constantly alert to the potential hazards of food play, in particular choking hazards and signs of previously undetected allergies.
- Pulses are not recommended as they can be poisonous when raw or may choke.
- Use of raw vegetables for printing is done occasionally and in line with the EYFS.
- Dried food that is used for play should be kept away from food used for cooking.
- Foods that are cooked and used for play, such as dough, have a limited shelf life.
- Cornflour is always mixed with water before given for play.
- Cornflower and cooked pasta are discarded after an activity due to high risk of bacteria forming.
- Utensils used for play food are washed thoroughly after use.

### Children's cooking activities

- Before undertaking any cooking activity with children, members of staff should check for allergies and intolerances by checking children's records.
- Children are taught basic hygiene skills such as the need to wash hands thoroughly before handling food, and again after going to the toilet, blowing their nose or coughing.
- The area to be used for cooking is cleaned; a plastic tablecloth is advised.
- Utensils provided are for children to use only when cooking, including chopping/rolling boards, bowls, wooden spoons, jugs, and are stored in the kitchen.
- Members of staff encourage children to handle food in a hygienic manner.
- Food ready for cooking or cooling is not left uncovered.
- Cooked food to go home is put in a paper food bag and refrigerated until home time.
- Food play activities are suspended during outbreaks of illness.

# Pippins Preschool Policies: 03.05 Meeting dietary requirements policy

Section 03 Food safety and nutrition

# 03.05 Meeting dietary requirements

Snack and mealtimes are an important part of the day. Eating represents a social time for children and adults and helps children to learn about healthy eating. At snack time, we aim to provide nutritious food and drink which meets the children's individual dietary needs and preferences.

- Staff discuss and record children's dietary needs, allergies and any ethnic or cultural food preferences with their parents.
- If a child has a known food allergy, procedure 04.04 Allergies and food intolerance is followed.
- Parents give information about their child's dietary needs in registration forms; parents sign to signify that it is correct.
- Up-to-date information about individual children's dietary needs is displayed so that all staff and volunteers are fully informed.
- Staff ensure that children receive only food and drink that is consistent with their dietary needs and cultural or ethnic preferences, as well as their parent's wishes.
- Parents are informed that at snack times, we offer fresh and dried fruit and vegetables and items such as breadsticks, rice cakes and toast. Milk and water are offered to drink
- When food is offered other than the usual snack items, the ingredients are displayed for parents to view with allergens highlighted.
- Staff provide a vegetarian alternative when meat and fish are offered.
- Where it is not possible to source and provide Halal meat or Kosher food, a vegetarian option is available; this will be discussed and agreed with parents at the time of the child's registration.
- All staff show sensitivity in providing for children's diets, allergies and cultural or ethnic food preferences. A child's diet or allergy is never used as a label for the child, they are not made to feel 'singled out' because of their diet, allergy or cultural/ethnic food preferences.
- Fresh drinking water is available throughout the day. Staff inform children how to obtain the drinking water and that they can ask for water at any time during the day.
- Meal and snack times are organised as social occasions.

#### Fussy/faddy eating

- Children who are showing signs of 'fussy or faddy eating' are not forced to eat anything they do not want to.
- Staff recognise the signs that a child has had enough and remove uneaten food without comment.
- Children are not made to stay at the table after others have left if they refuse to eat certain items of food.
- Staff work in partnership with parents to support them with children who are showing signs of 'faddy or fussy eating' and sign post them to further advice, for example, How to Manage Simple Faddy Eating in Toddlers (Infant & Toddler Forum) https://infantandtoddlerforum.org/health-and-childcare-professionals/factsheets/
